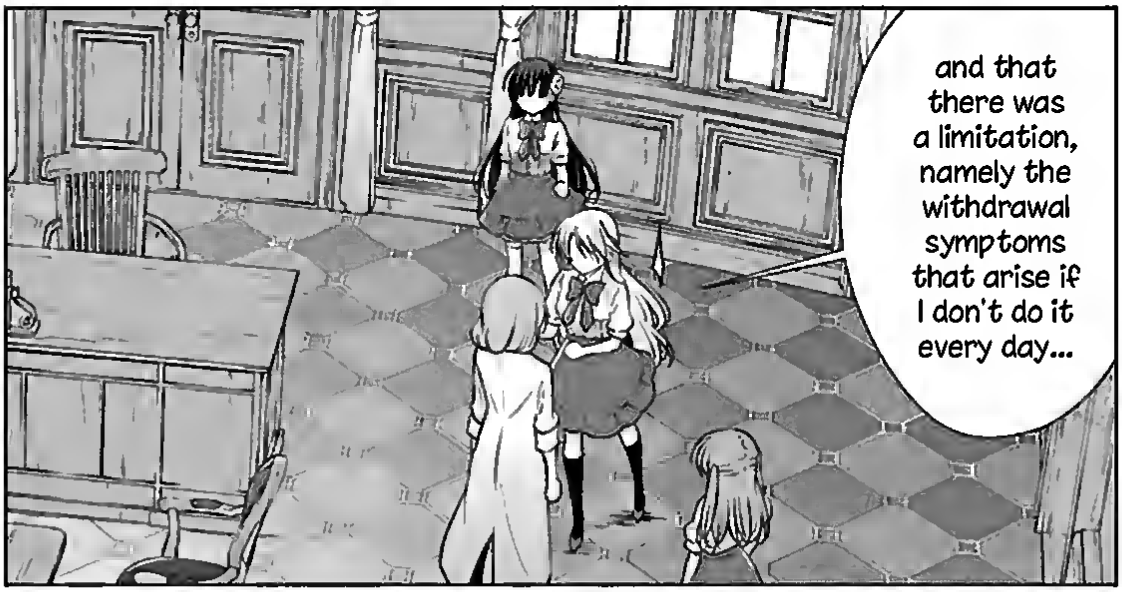
The day I was first bitten by Senpai.

the stewartias had already scattered.

I will be dead

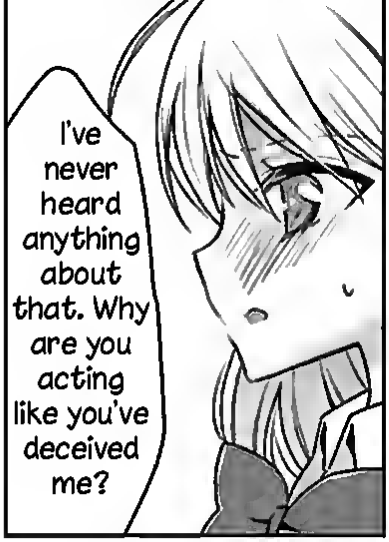
around this time next year...?

What do you mean ...?
Shion... You said that sucking blood only made me feel pleasure,



and that there was a limitation, namely the withdrawal symptoms that arise if I don't do it every day...

I've told you before— you can't escape your destiny.
If I hadn't lied, you wouldn't have been able to do it, right?



I've never heard anything about that. Why are you acting like you've deceived me?

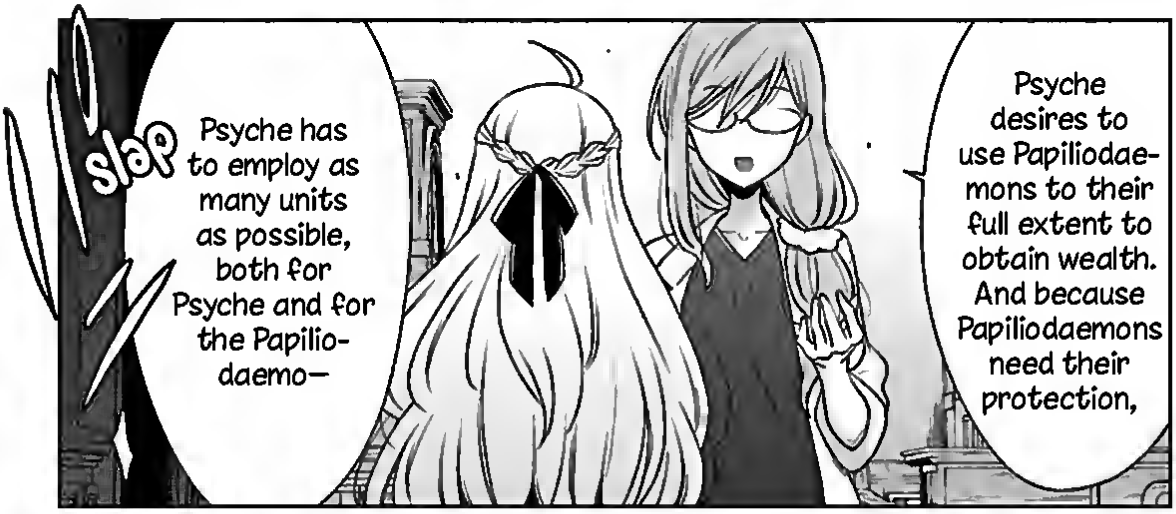
Pretty much a normal human.
Yay, yay
Urgh, I ate lunch but I can only be fed by blood.
After Papiliodaemons grow up and go through their perverted period, they can only be nourished by sucking blood,
so if you don't learn how to do it before you turn eighteen, you're going to starve to death★



Slap
Psyche has to employ as many units as possible, both for Psyche and for the Papilio-daemo—
Psyche desires to use Papiliodaemons to their full extent to obtain wealth. And because Papiliodaemons need their protection,

Then I'm...
I'm so sorry, Ayafuji-san.

Papilio-daemons can only survive by
being a parasite to human society and stealing the life of their brides.
Iris, I'm just going to come out and say this to you.

...I'm going to die?
Mom, Dad, and Grand-mother died,
and now I only have one more year to live...
Ayafuji-chan!
I wonder, what was I even born for?

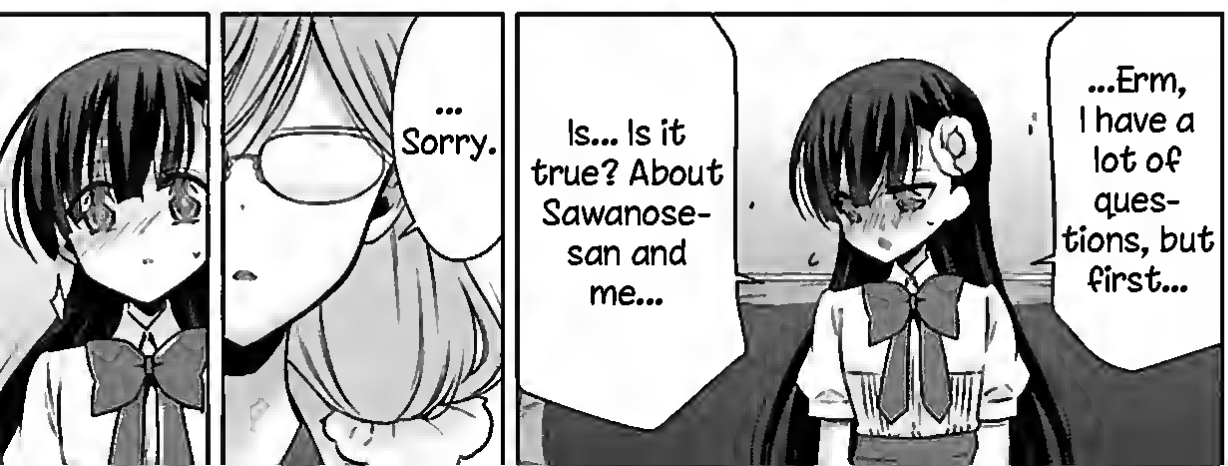
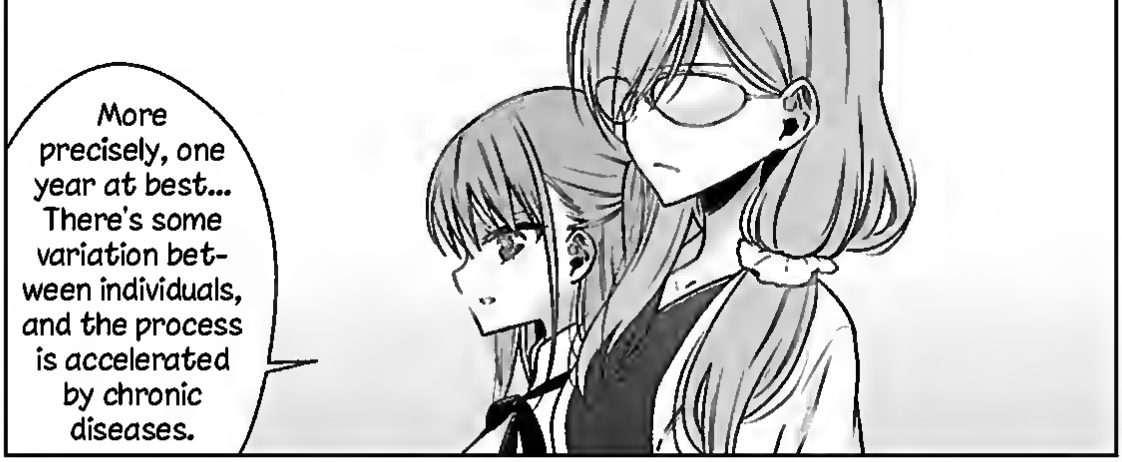
Sorry for the wait!

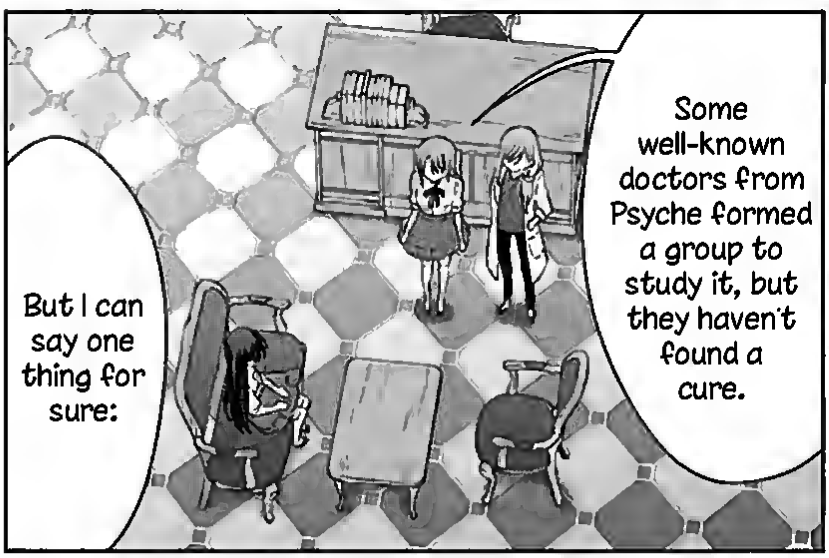


...
Sorry.
Is... Is it true? About Sawanose-san and me...
...Erm, I have a lot of questions, but first...



More precisely, one year at best... There's some variation between individuals, and the process is accelerated by chronic diseases.

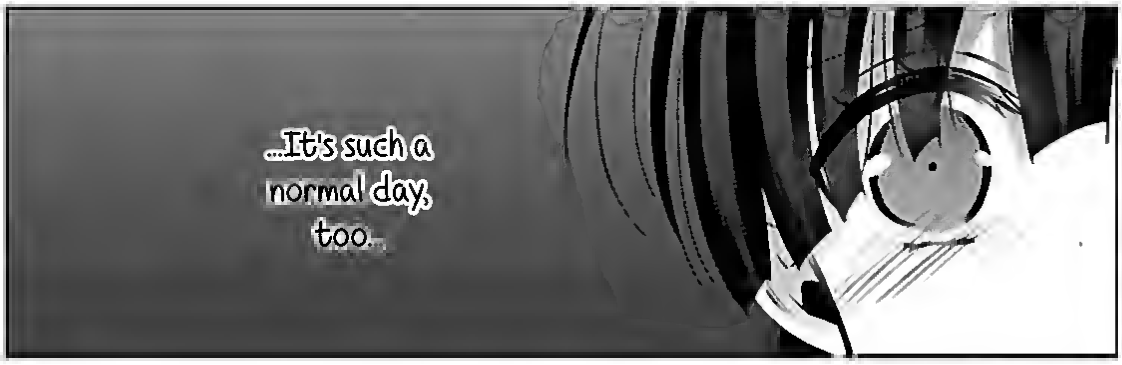
Sucking blood causes stem cells in the blood to develop anomalies, which slowly eat away the body from the inside.



But I can say one thing for sure:
Some well-known doctors from Psyche formed a group to study it, but they haven't found a cure.

Is... Is there a cure?

No bride has ever survived.



...It's such a normal day, too...

Al-
though,
it was on a typical day like this when, all of a sudden, Grand-mother-

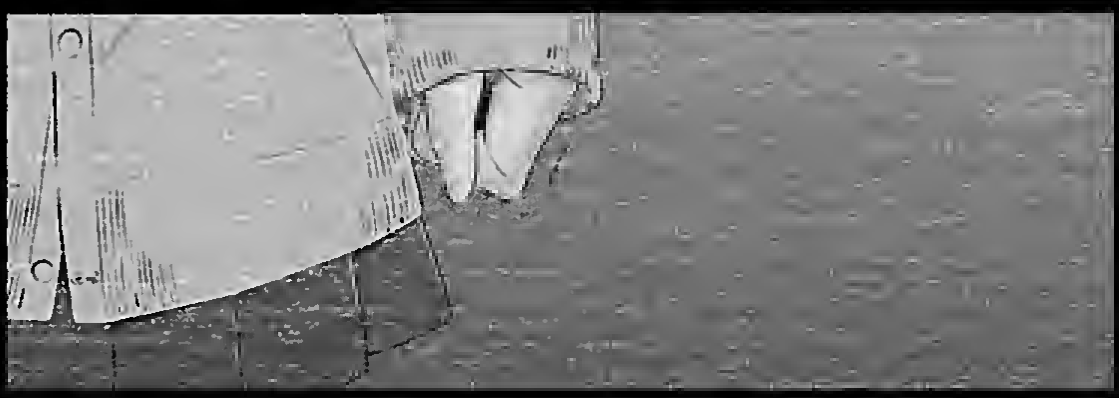
Ayafuji Atsushi

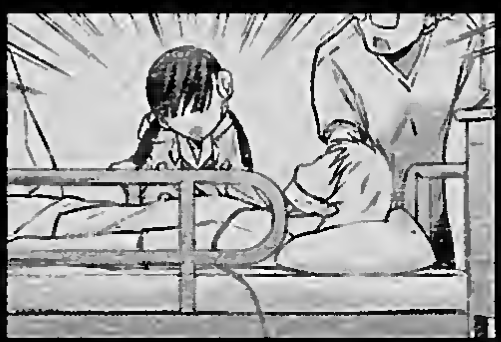
Grand-mother was hospitalized. She became paralyzed and couldn't remember the names of things.
Even though she was discharged, she was admitted again.
This time, she couldn't even hold a pen.

and though she wanted to talk, it was difficult for her because she couldn't remember names.
Her once-straight back quickly bent.

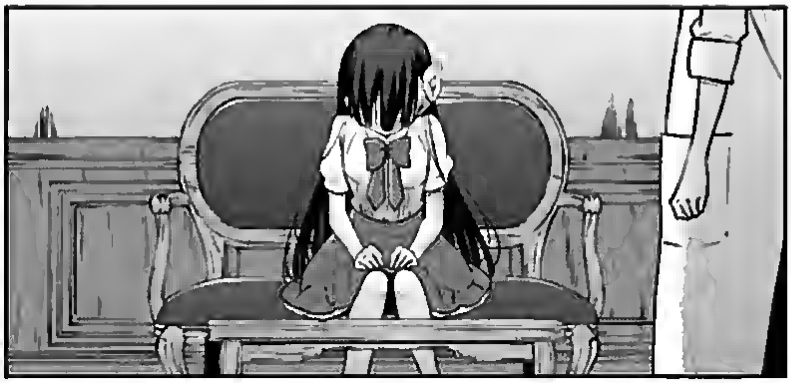
She became quieter and quieter.



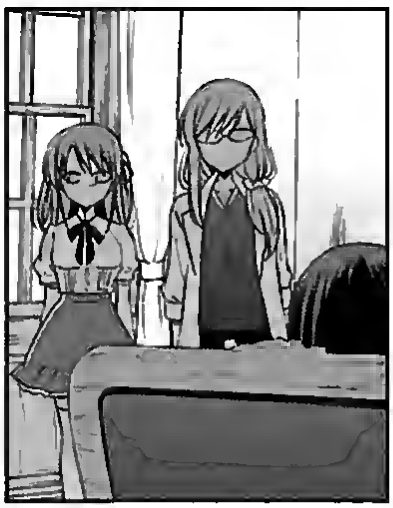
A few days after that...

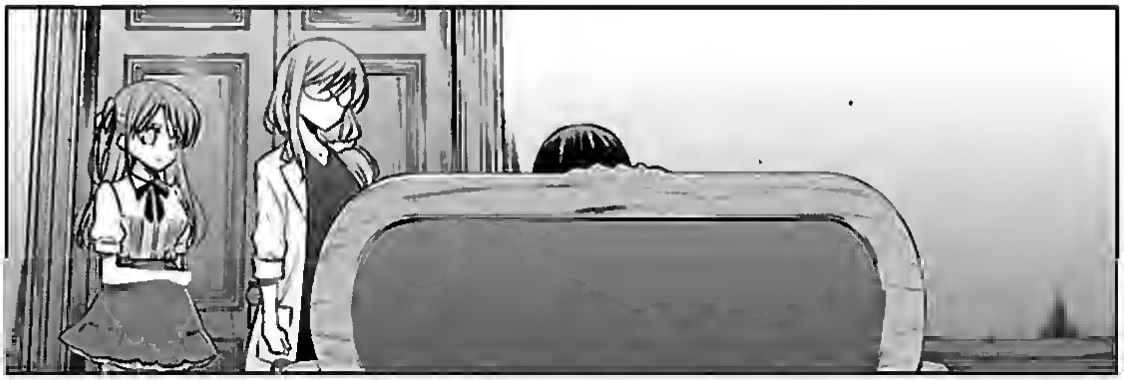


She left, incapable of saying anything.



...I'm really sorry for deceiving you and Iris.

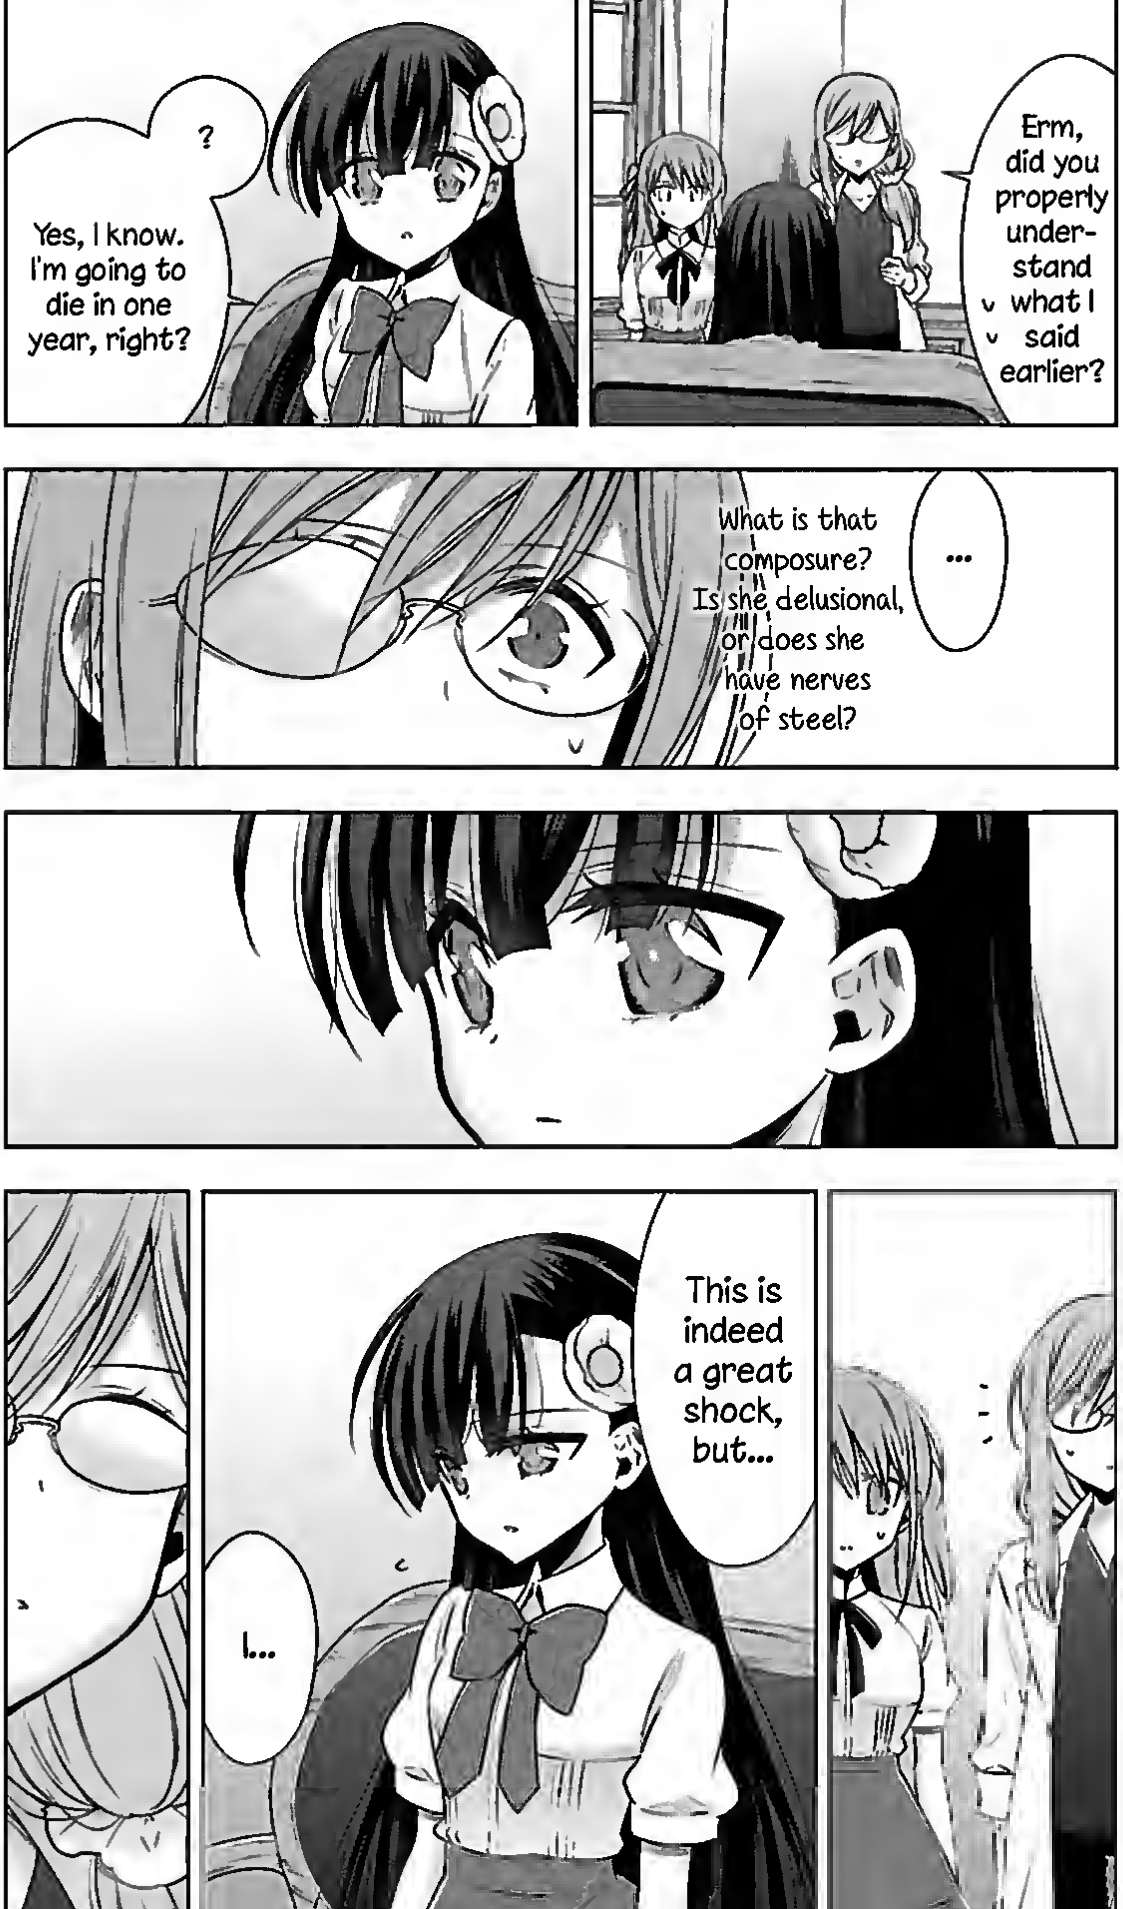




clench

Um, can I go look for Senpai now?
She hasn't sucked my blood yet today.

!!?

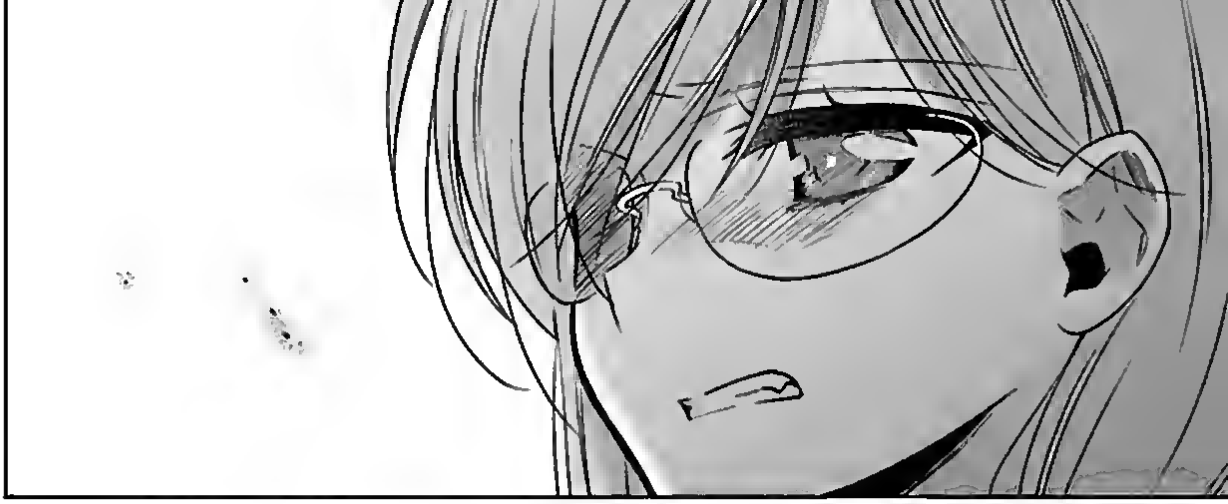


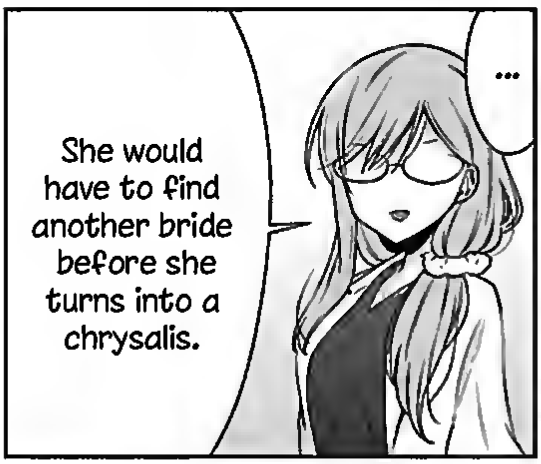
Yes, I know. I'm going to die in one year, right?
?
Erm, did you properly understand what I said earlier?
What is that composure? Is she delusional, or does she have nerves of steel?
...
This is indeed a great shock, but...
I...

I couldn't stop crying.
When Grandmother's condition became critical, she died without being able to express herself.
When the hospital contacted me, I ran into her room, my eyes red and swollen.
The last she saw of me was my crying face, and she died before I was able to tell her anything.
It must have left her heartbroken...

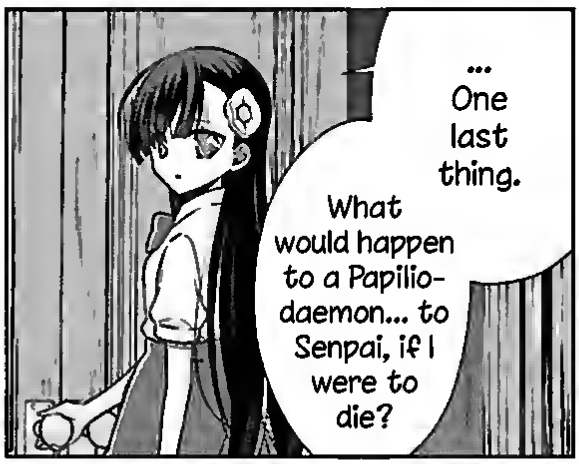
If I'm going to die,
I won't cry, and I won't stay silent.

I'm going.





...
She would have to find another bride before she turns into a chrysalis.



...
One last thing.
What would happen to a Papilio-daemon... to Senpai, if I were to die?

Then, you too...?
Another ... bride ...

I don't feel too bad about it. I can flirt with girls forever, isn't that lucky?

Yup! Look, I'm happy-go-lucky, you know?

Your face looks much sadder than mine.
Sensei, you're not lucky at all.
